

# Improvement of Energy Efficiency (IEE) of the Water Authority of Jordan

## What is Energy Performance Contracting?

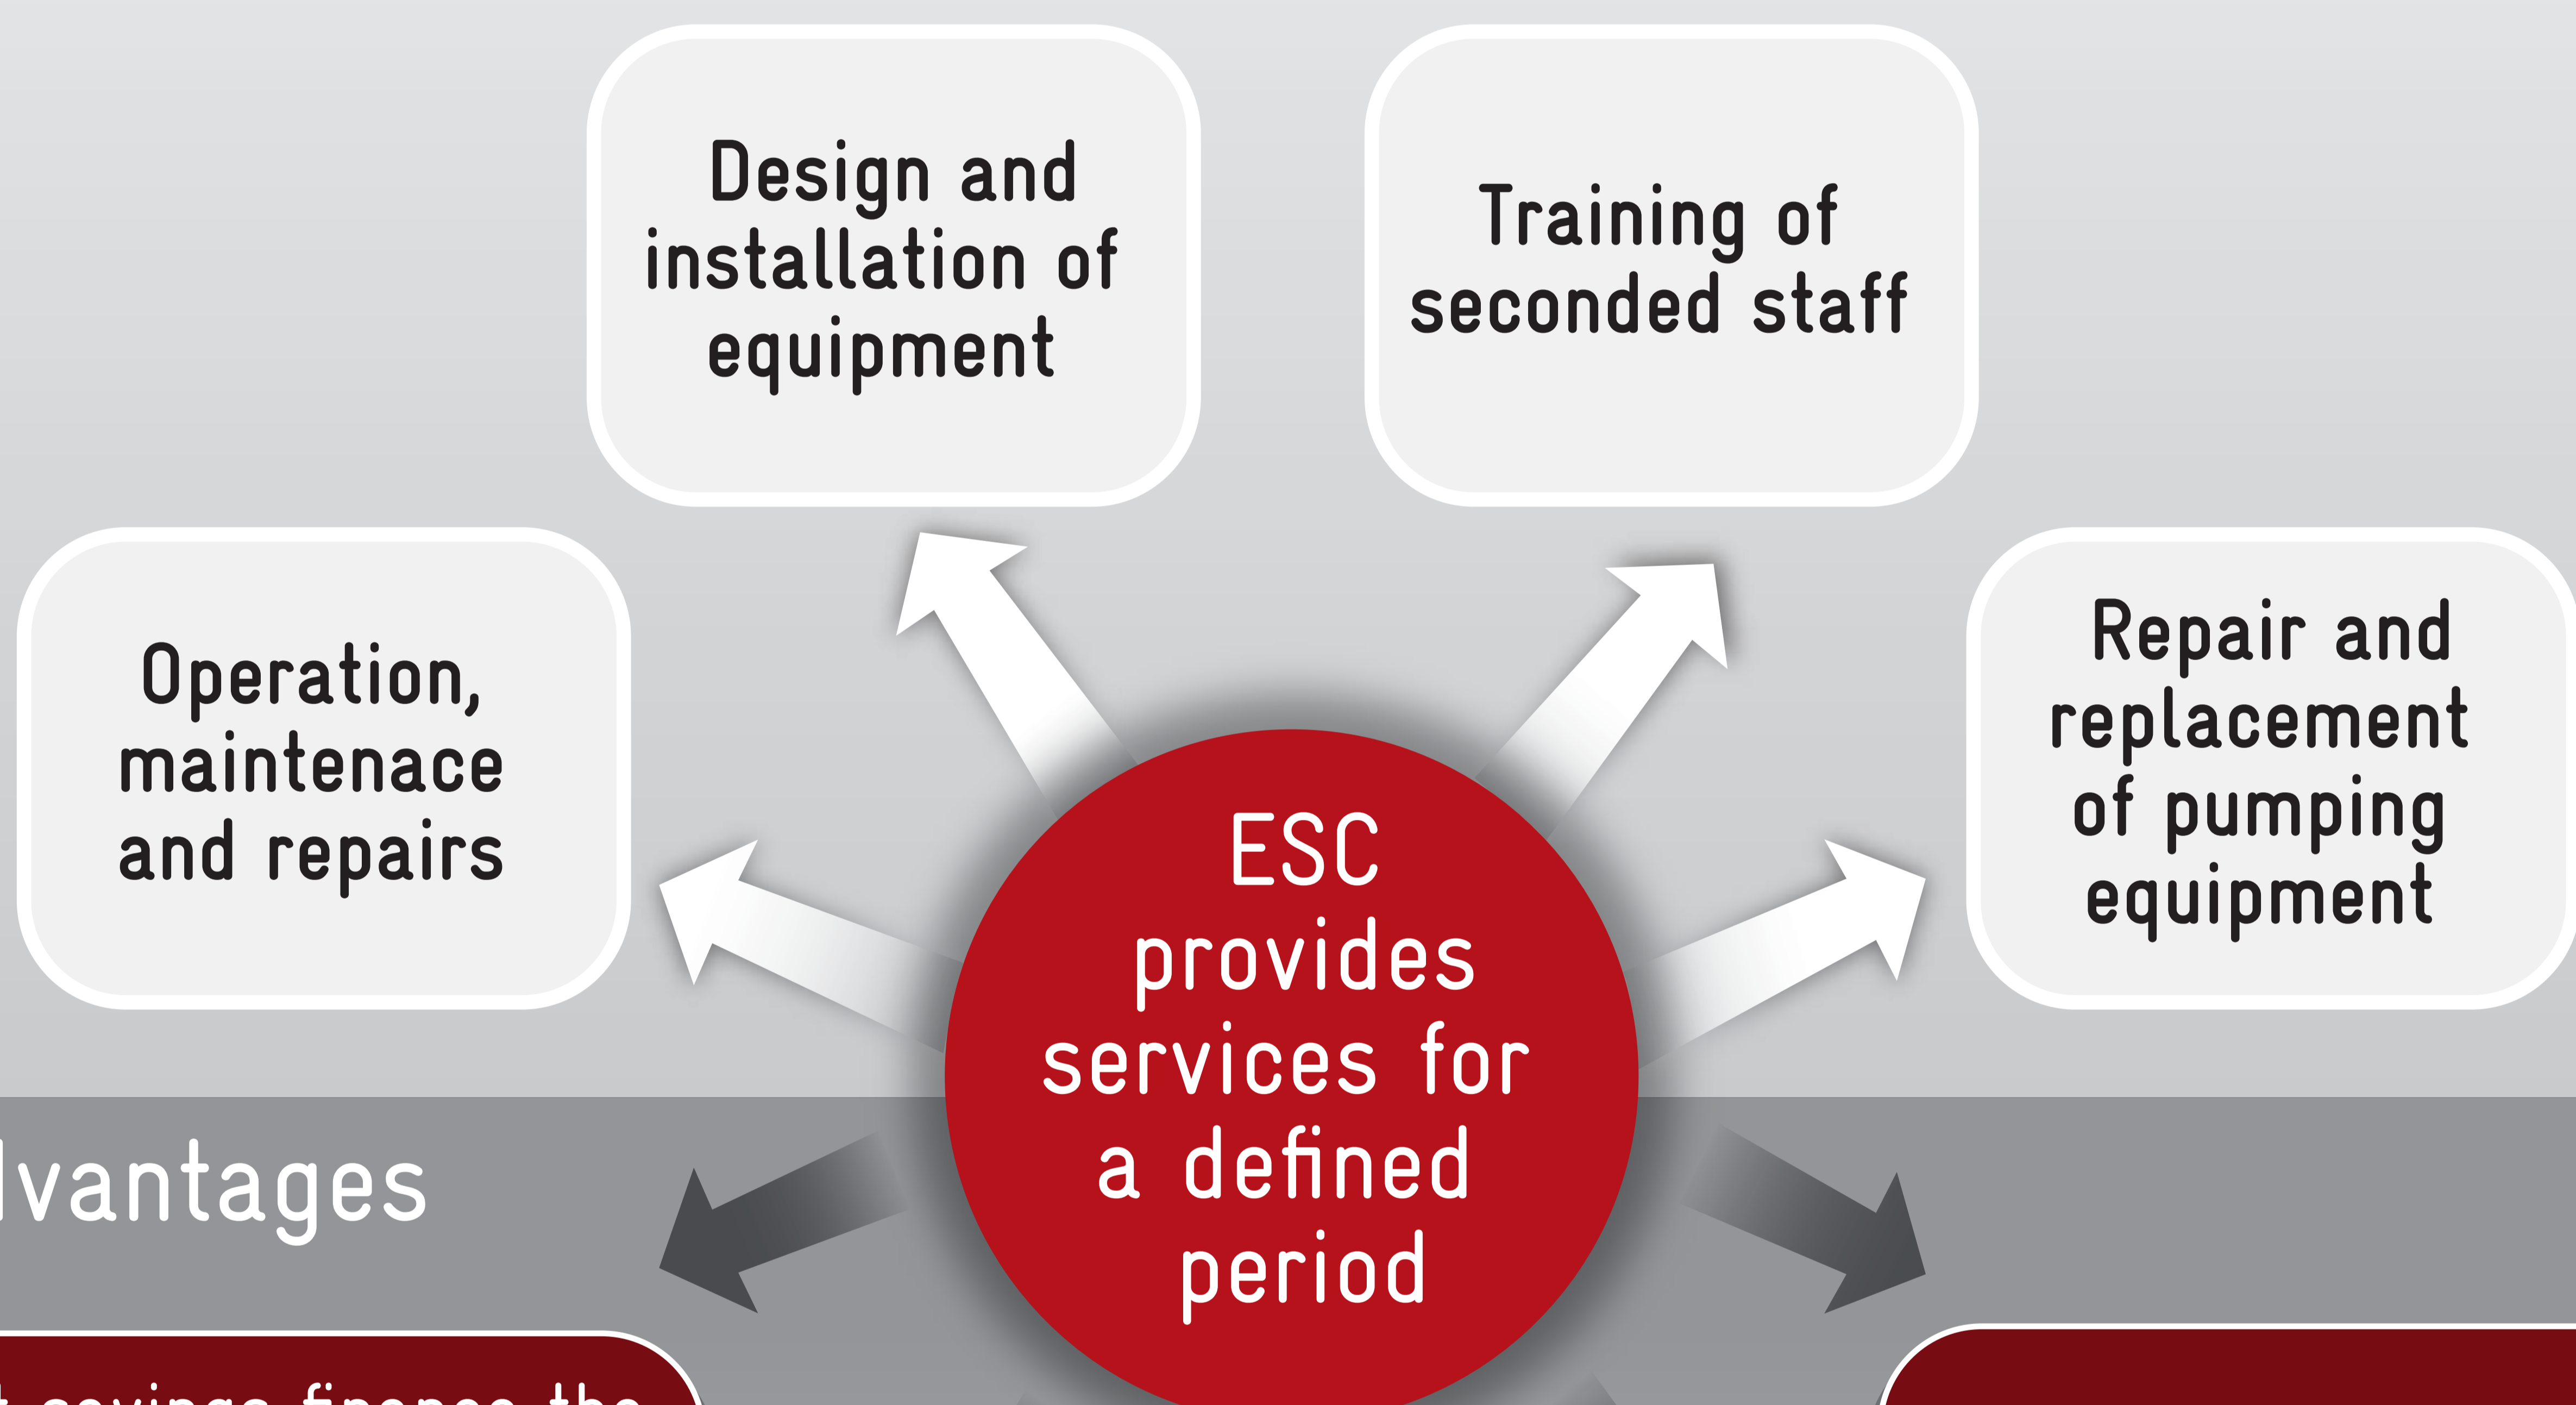

In Energy Performance Contracting in Jordan, a specialised Energy Service Company (ESC) will finance and/or operate pumping stations on a performance basis, with payments linked to reduced specific energy use (kWh/cbm pumped).

## Energy Performance Contracting applied in Jordan

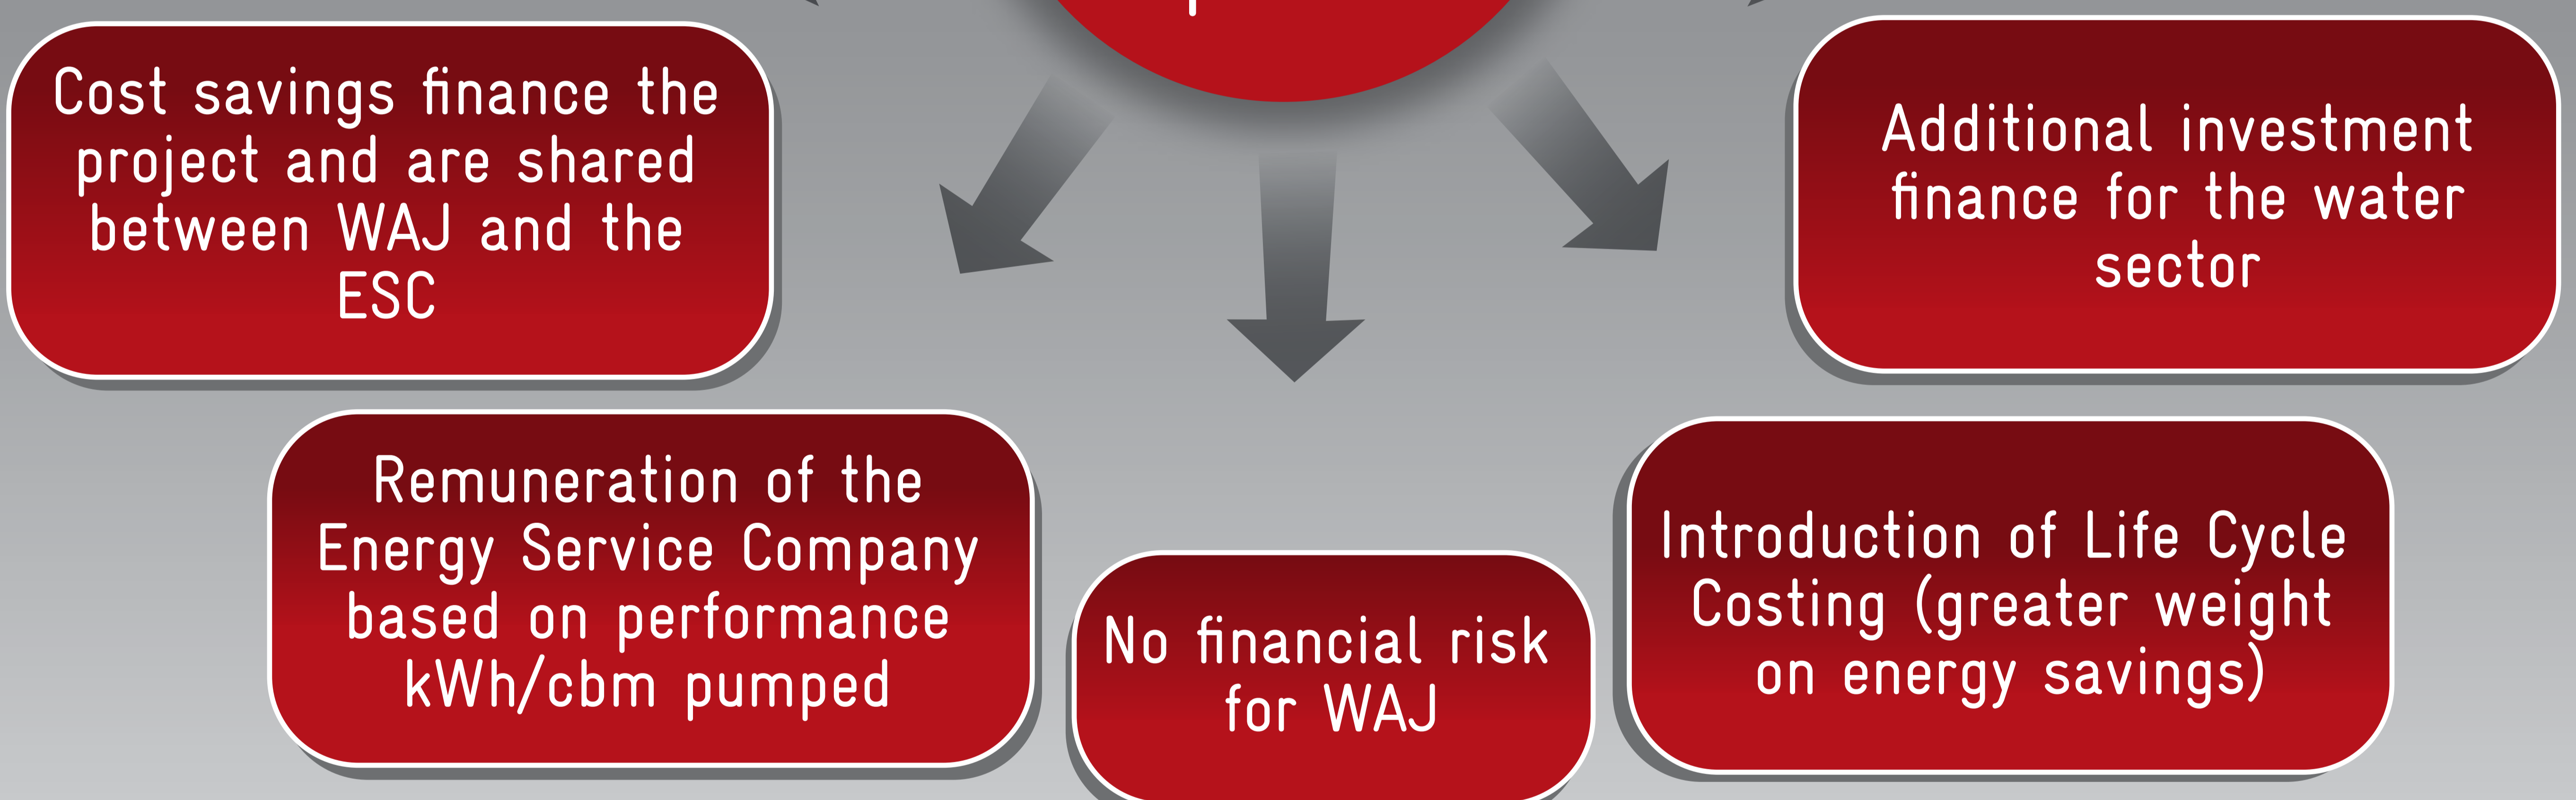

Project area: 11 pumping stations in Middle Governorates (Madaba, Balqa, Zarqa.).

## Concept

## Advantages

**Energy Performance Contracting - an innovative tool for sustainable operations of vital water infrastructure leading to higher carbon efficiency**
